## 1 SYSTEM USED

Sonar: Bathyswath-1 (SWATHplus) - 468 kHz  
Motion sensing and positioning: Coda-Octopus F180

## 2 SURVEY DESCRIPTION

This site survey was performed for Fugro and consisted in surveying the mooring quay and channel approaches for a rig move. Main survey area was approximately 500m by 500m in water depths from 0m to 15m. The survey was undertaken in under a day, follow-on survey from the John Chance Land Survey trials on the Mississippi. Height control using observed tides from a local NOAA tide station.
